

Python Fresher Interview - Logic Building Questions & Solutions

This PDF contains important Python logic building interview questions with solutions for fresher candidates.

Q1. Reverse a String

```
text = input("Enter a string: ")
rev = ""
for ch in text:
    rev = ch + rev
print(rev)
```

Q2. Check Prime Number

```
num = int(input("Enter number: "))
if num > 1:
    for i in range(2, num):
        if num % i == 0:
            print("Not Prime")
            break
    else:
        print("Prime")
```

Q3. Fibonacci Series

```
n = int(input("Enter terms: "))
a, b = 0, 1
for i in range(n):
    print(a, end=" ")
    a, b = b, a+b
```

Q4. Largest of Three Numbers

```
a = int(input())
b = int(input())
c = int(input())

if a >= b and a >= c:
    print(a)
elif b >= a and b >= c:
    print(b)
else:
    print(c)
```

Q5. Palindrome Number

```
num = int(input())
original = num
rev = 0

while num > 0:
    digit = num % 10
    rev = rev * 10 + digit
    num = num // 10

if original == rev:
    print("Palindrome")
```

Q6. Count Vowels

```
text = input()
count = 0

for ch in text.lower():
    if ch in "aeiou":
        count += 1

print(count)
```

Q7. Factorial Using Recursion

```
def factorial(n):
    if n == 1:
        return 1
    return n * factorial(n-1)

print(factorial(5))
```

Q8. Bubble Sort

```
arr = [5,2,8,1,9]

for i in range(len(arr)):
    for j in range(len(arr)-i-1):
        if arr[j] > arr[j+1]:
            arr[j], arr[j+1] = arr[j+1], arr[j]

print(arr)
```

Q9. Binary Search

```
arr = [10,20,30,40,50]
target = 40

low = 0
high = len(arr)-1

while low <= high:
    mid = (low + high) // 2

    if arr[mid] == target:
        print("Found")
        break
    elif arr[mid] < target:
        low = mid + 1
    else:
        high = mid - 1
```

Q10. Simple Calculator

```
a = int(input())
b = int(input())

op = input()

if op == "+":
    print(a+b)
elif op == "-":
    print(a-b)
elif op == "*":
    print(a*b)
elif op == "/":
```

```
print(a/b)
```
